

1,000 CRANES FOR PHILLY

WILMA

We Need Your Help!

Join others across the city in the Japanese traditions of folding 1,000 cranes. Cranes are a symbol of peace and well-being, as well as hope and healing during challenging times. It is said that folding 1,000 cranes will make one special wish come true. There is no wrong way to make a crane. Every response counts!

There is no wrong way to help us make cranes:

FOLD: Use the instructions and the cut-out on the back of this sheet to fold a crane.

WRITE: Use the cut-out as space to write a story or a poem of peace.

DRAW: Use the cut-out as an open canvas to draw a symbol of hope.

Our cranes will live a long life in a public art installation created by Ezra J. Ali-Dow in the Sunday Breakfast Rescue Mission.

Origami Tips

1. Cut out the square to practice or use as a template for your own paper.
2. Using a bigger square paper can make the process easier.
3. **It's ok if you don't get it right the first time.** The more you make, the better you'll become at it.
4. The folds you make are a part of the next steps- creasing your paper well is a part of the process.
5. Your cranes don't need to be perfect to be loved!

Send your cranes to:

*Thank you origami.me!
You can find more tips on their website.*

Cut or rip along the dotted line to use as origami paper or as a canvas for what hope means to you.

- 1 Start with the white side of the paper facing up. Fold the paper in half to make a triangle.

- 2 Fold in half again along the dotted line.

- 3 Begin to fold that flap back, but squash the fold by flattening the flap down.

- 4 The layer of paper should lay flat like a diamond. Turn the model over.

- 5 Now we're going to repeat steps 3 and 4 on this side. Fold the flap on the left along the dotted line.

- 6 Then squash the fold by flattening the flap down until the paper is a flat square. You've made a base for your crane!

- 7** Fold the right side flap to the center along the dotted line. Crease this well, then unfold it.

- 8** Repeat step 7 on the left flap. Crease well and unfold it.

- 9** Fold the top down along the dotted line. Crease this well and unfold.

- 10** Lift the top flap of paper from the opening facing you. Use your index finger to hold the bottom layer of paper down and flatten everything along the creases you made in the past three steps.

- 11** You just completed a petal fold! The top layer should now look like a kite. Turn your paper over, we're going to make a petal fold on the other side too!

- 12** Fold the right side flap to the center along the dotted line. Crease this fold well and unfold.

- 13** Repeat step 12 on the left flap. Crease well and unfold it.

- 14** Fold the top down along the dotted line. Crease this well and unfold.

- 15** We're making a petal fold like on the other side! Lift the top flap of paper from the opening facing you. Use your index finger to hold the bottom layer of paper down and flatten everything along the creases you made in the past three steps.

- 16** Your paper should look like a kite, but the side facing you is not connected. These two flaps will be the neck and tail. Fold the top flap of paper on the right to center along the dotted line. Crease well.

- 17** Fold the top flap on the left to the center along the dotted line as well.

- 18 Turn your model over.

- 19 Repeat the folds of the top flaps of paper on the right and left flaps from step 16 and 17. Your paper looks like this.

- 20 Fold the long thin flaps of paper on the left and right. Fold both flaps back and forth until the layers of paper are creased well.

- 21 Now you're going to use the crease from Step 20 to fold the right flap up into the top part of the model. Slightly open the entire right side. Use your index finger to fold the bottom flap up. The thin flap will fold along the dotted line to fit inside the base of the crane.

- 22 Repeat Step 21 on the left flap. Now made the tail of your crane!

- 23 Now to fold the head! Fold the section of paper on the right side to the dotted line. Fold back and forth until the layers of paper are creased well.

- 24 Use the tips of your fingers to go into the crease you just made to reverse the fold, and flatten the top of the triangle to make the crane's head.

- 25 Fold down the wings on both sides along the dotted line.

- 26 You've completed your origami crane, good job!
